# If you are feeling the sting in the classroom buzz, don't miss the first **Power Teaching** conference in Florida!

Power Teaching (PT) is one of the fastest growing education reform movements in the United States.

In the last 10 years, PT, employing some of the latest advances in brain research, has developed a remarkable suite of classroom management tools for engaging and building the test scores of the most (and least!) challenging kids.

Over 6,000 teachers representing over a quarter of a million students have attended free PT conferences. YouTube and TeacherTube PT videos have been viewed by over 500,000 educators. PT websites receive over 2,000 hits per day. Amazingly enough, all their materials and videos are available as free downloads at [powerteachers.net](http://powerteachers.net).

The Florida conference will be presented by Chris Rekstad, Co-Founder of Power Teachers of America. In the last 10 years, Chris, a specialist in elementary education, has been a lead presenter at over 40 Power Teaching conferences.

## **Airports:**

PBI - Palm Beach International-13 mi.  
FLL - Fort Lauderdale/Hollywood International - 53 mi.
